

Custom Metal Awnings

The Wave Awning is available with custom radius members. The Wave may be mounted directly to a wall or supported by upright legs.

Louwer Awnings are available with or without upright supports and can easily support additional live and dead loads.

Standing Seam Awnings are available with a variety of seam spacing and radius shapes.

Eide Industries offers a large variety of custom Trellis shapes including custom perimeter and projection arm styles.

Eide Industries, Inc. custom metal awnings include specifications, shop drawings and engineering calculations. For more information about our custom metal awnings, call Eide Industries' sales department.
